

## 3M WHITE POLYESTER LABEL

### Description

Indianbarcode offers excellent abrasion and chemical resistance. Heavy adhesive coat weight for textured surfaces. Excellent adhesion to low surface energy plastics, powder paint coatings and oily metal surfaces. Excellent high-temperature performance. Heavy lay flat liner provides easy sheet processing. UL recognized and CSA accepted.

### Technical Specification

|                               |   |
|-------------------------------|---|
| Brand                         | 3M  |
| Color                         | White   |
| Face-Side Adhesive Thickness  | 1.8 mil   |
| Face-Side Adhesive Type       | 350 High Holding Acrylic  |
| Facestock                     | Polyester   |
| Facestock Color               | White   |
| Facestock Finish              | Gloss   |
| Industries                    | Converter Solutions , Transportation , Specialty Vehicle , Automotive , Medical , Military & Government , General Industrial , Electronics , Consumer Goods , Packaging |
| Liner Thickness               | 6.8 mil   |
| Liner Type                    | Polycoated Kraft  |
| Liner Weight                  | 94 lb.  |
| Maximum Operating Temperature | 300 Degree Fahrenheit   |

(Fahrenheit)

Minimum Operating  
Temperature -40 Degree Fahrenheit  
(Fahrenheit)

Moisture Resistance High

Permanent Adhesion to Metal , Powder Coats , HSE Plastic , LSE Plastics

Plasticizer Resistance Medium

Print Method Screen|Flexo|Thermal Transfer

Product Form Roll

Size Custom Slit

Solvent Resistance High

Topcoat TC

UV Resistance Medium

## Features

Indianbarcode offers excellent abrasion and chemical resistance. Heavy adhesive coat weight for textured surfaces. Excellent adhesion to low surface energy plastics, powder paint coatings and oily metal surfaces. Excellent high-temperature performance. Heavy lay flat liner provides easy sheet processing. UL recognized and CSA accepted.
